10 active, 128 total, 18 maximum concurrent
```

So... Only informix user system sessions. Now let's run the program (I'll do it as root):

```
cheetah2@pacman.onlinedomus.net:root-> ./test.4ge
Insert your username: fnunes

Insert your password: [......][ENTER]

We are authenticated, but not yet connected to a database...
```

The program is now holding at the first "PROMPT" instruction after the connect. Let's see the list of sessions:

```
cheetah2@PacMan.onlinedomus.net:informix-> onstat -u
